Liners	<input type="checkbox"/> Honed	<input type="checkbox"/> NEW
Pistons	<input type="checkbox"/> Remanufactured	<input type="checkbox"/> NEW

Contact your Sales Rep for details and pricing.

PowerSeal Solutions, PowerRail's own manufacturer and fabricator of fluid-sealing products, has developed an alternative to the OEM Main Seal on an air compressor.

The newly developed B-Sure™ Main Seal offers:

- High Heat material - performance up to +400°F
- Wider surface for a better seal
- Seal on seal technology to prevent wear on the shaft

PowerRail also offers a full line of WBG 6-cylinders and Motor Driven air compressors.

Visit our website for more details.
